Damage and Death
Unconscious: Characters at 0 HP are unconscious, but not dying.
Bleeding: Characters at <0 HP are bleeding out; they have 1 round per level to be healed to above 0 before they die. If healed, they suffer -1 reduction to a random stat, permanently; they also gain a magnificent scar and a story for the fireside.
Recovering the dead: If a dead character's body can be recovered within 1 hour of death, they may make one final Luck check (aiming below Luck). If they manage this, they are alive but grievously wounded, suffering the amount of damage they had (eg. points below 0) as permanent reductions to their stats (defined at random, divided evenly), additionally they suffer the Dazed effect for 1 hour.

Non-Magical Healing
Healer's Kits and Surgery: Suitable occupations or tools can be used to administer to the wounded and bleeding (Judge's discretion). The same round constraints apply as with magical healing, the check DC equals (20 - current STA - current HP), successful roll returns the character to life with 1 HP.

Stat Loss Effects at 0*	
Strength	Feeble and incapable of movement.
Agility	Crippled and incapable of movement.
Stamina	Comatose.
Personality	Morose and incomprehensible.
Intelligence	Unresponsive and catatonic.
Luck	So slapstick it's not even funny.

*: If two stats reach 0, the character is dead without an option for recovery.

Catching Fire
A DC 10 Ref save each round to extinguish or suffer 1d6 damage.

Falling Damage
1d6 per 10' fallen, every 6 rolled causes 1 point of permanent STR/AGI loss.
